

```
class Q2{
    public static void main (String args[]){

        int n = -7;
        if (n>0){
            System.out.println("Number is not negative");
        }

        else{
            System.out.println("Number is negative");
        }
    }
}
```
